

ILLEGIB

30 July 1964

  
General Carter:

The following memorandum from OSA is of special interest because:

a. The author is a level-headed man, not given over to the usual exaggerations in OSA;

25X1A

b.  is very close to McMillan and has recently come out of his shell in an aggressive way, giving the kinds of statements of which this is an example.

25X1A

The significance of the differential between the  sub-missions and the OSD approvals for FY 56-59 is that the latter contain no monies for  and presumably refer only to the continuing OXCART and U-2 program. Insofar as  is actually reflecting DOD policies, these figures pretend to prejudge current discussions and CIA participation in the satellite reconnaissance program.

25X1A
